Aluminium concertina loft ladders

Supreme

The Supreme heavy duty aluminium loft ladder is supplied as a ready to fit unit, manufactured from high strength die-cast aluminium alloy components contained within, and attached to, a laminated wood hatch box and a 62mm thick sandwich construction insulated trapdoor. The heavy duty spring mechanism allows you to raise and lower the ladder with a minimum of effort. Large steps and pre-assembled telescopic handrail offer comfort, safety and ease of egress.

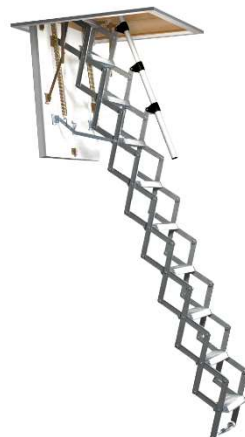

- Ease of operation (operation force less than 3kg)
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 4600mm (subject to model)
- High energy efficiency of 0.58 W/m²K
- Can be specified to meet F30, F60 or F90 fire resistance
- Can be made-to-order to meet your exact specification, with a wide-range of accessories
- Deep step depth of 140mm for safety and convenience
- Available with a low-noise electric motor for the ultimate in convenience
- Available with a vertical hatch

Mini

The Mini aluminium loft ladder is specially designed for small ceiling openings. It is supplied as a ready to fit unit, consisting of a space-saving aluminium ladder contained within, and attached to, a laminated wooden hatch box. The insulated trapdoor provides good energy efficiency and both sides are finished in white for improved aesthetics. It comes assembled with a telescopic handrail for comfort and safety

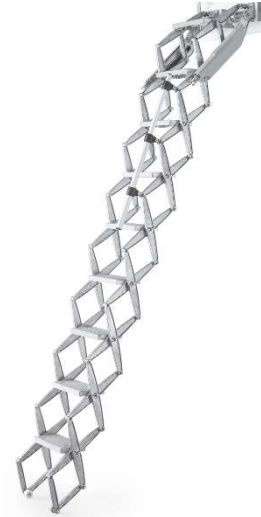

- Designed for use in small ceiling openings
- Concertina aluminium loft ladder
- Load capacity of 150kg per step
- Maximum floor to ceiling height of 3250mm
- Hatch box and insulated trapdoor for energy efficiency (rating of 0.80 W/m²K)
- Can be specified to meet F30 and F60 fire resistance
- Can be made-to-order to meet your exact specification, with a wide-range of accessories

Elite

The Elite aluminium loft ladder is supplied as a ready to fit unit, manufactured from high strength die-cast aluminium alloy components. This ladder is supplied with two heavy duty counter-balanced springs incorporated into pivot brackets to ensure that it can be raised and lowered with a minimum of effort. Large steps and pre-assembled telescopic handrail offer comfort, safety and ease of egress.

- The ideal ladder for a renovation project or replacement of an old loft ladder or for fitting into an existing hatch box.
- Suitable for smaller ceiling openings (from 620mm long and 430mm wide).
- Easy to install
- Ease of operation (operation force less than 3kg)
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 3390 mm
- Deep step depth of 140mm for safety and convenience
- Available with a special headboard (pictured) featuring additional height-adjustable steps for applications below flat roof covers, light domes and roof windows.
- Available with hinge mechanism for use on a mezzanine floor or in vertical hatches

Piccolo

The Piccolo aluminium loft ladder is supplied as an easy to fit unit, manufactured from aluminium alloy components. The Piccolo's compact, space-saving design makes it the perfect loft ladder for very small ceiling openings or use in an existing hatch box.

- Designed for use in very small ceiling openings
- Concertina aluminium loft ladder
- Load capacity of 150kg per step
- Maximum floor to ceiling height of 2900mm
- Supplied ready to install
- Available with counter-balance spring for ease of operation (Piccolo Premium)
- Piccolo Premium is available with hinge mechanism for use on a mezzanine floor or in vertical hatches.

Wooden loft ladders

Designo

The Designo wooden loft ladder perfectly balances aesthetics with strength and quality. It is supplied as a ready to fit unit, consisting of a 3-part folding wooden ladder contained within, and attached to, a laminated wood hatch box and an insulated trapdoor. The Designo heavy duty wooden loft ladder offers excellent energy efficiency thanks to a 6-point locking mechanism on the trapdoor and sealed hatch box.

- Sets the standard for wooden loft ladders in energy efficiency, long-lasting quality and ease-of-installation
- High energy efficiency of 0.60 W/m²K thanks to a 6-point locking mechanism on the trapdoor and sealed hatch box
- High strength, heavy duty wooden loft ladder, with a load capacity of 180kg per step
- Maximum floor to ceiling height of up to 3300mm
- Can be made-to-order to meet your exact dimensional requirements
- Wide steps / treads with anti-slip profile for comfort and safety
- Available with an optional passive house hatch box giving a U-value of 0.29 W/m²K

Cadet 3

The Cadet 3 is a traditional wooden loft ladder that offers an attractive design and is available in standard or made-to-measure sizes. It is supplied as a ready to fit unit, consisting of a 3-part folding wooden ladder contained within, and attached to, a wooden hatch box and an insulated trapdoor.

- Traditional three-part folding wooden loft ladder
- Good energy efficiency rating of 0.90 W/m²K
- Load capacity of 150kg makes it ideal for domestic use
- Maximum floor to ceiling height of 3200mm
- Can be made-to-order to meet your exact dimensional requirements
- Wide steps with anti-slip profile for comfort and safety
- Available as a two-part sliding ladder (Cadet 2), for increased floor to ceiling heights of up to 3340mm

Esca 11

The Esca 11 wooden loft ladder is a traditional wooden loft ladder manufactured from FSC® sourced wood. It is supplied as a ready to fit unit in standard sizes only, consisting of a 3-part folding wooden ladder contained within, and attached to, a wooden hatch box and insulated trapdoor.

- Three-part folding wooden loft ladder
- Manufactured from FSC® sourced wood
- Energy efficiency rating of 1.30 W/m²K
- Load capacity of 150kg makes it ideal for domestic use
- Maximum floor to ceiling height of 2850mm
- Available in standard hatch sizes only

The ProfiLine F30 / F30 Plus / F60

The ProfiLine F30 / F30 Plus / F60 is a fire resistant version of the Cadet 3 wooden loft ladder. It offers an attractive design and is available in standard or made-to-measure sizes. It is supplied as a ready to fit unit, consisting of a 3-part folding wooden ladder contained within, and attached to, a wooden hatch box and an insulated trapdoor.

The ProfiLine is certified by MPA Braunschweig for either 30 minutes from below (F30) or 60 minutes from below (F60), for installation in either wood-beamed ceilings or concrete ceilings. For concrete ceilings only, the ProfiLine is also certified to 30 minutes from below and above (F30 Plus).

- Traditional style 3 part folding wooden loft ladder
- Can be specified to meet F30, F30 Plus or F60 fire resistance
- Hatch box and insulated trapdoor for energy efficiency (rating of 0.92 W/m²K)
- Load capacity of 150kg per step
- Maximum floor to ceiling height of 3200mm
- Can be made-to-order to meet your exact dimensional requirements
- Wide steps with anti-slip profile for comfort and safety

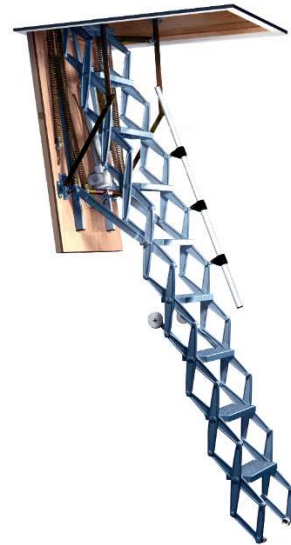

Electric loft ladders

Supreme Electric

The Supreme heavy duty aluminium loft ladder is supplied as a ready to fit unit, manufactured from high strength die-cast aluminium alloy components contained within, and attached to, a laminated wood hatch box and a 62mm thick sandwich construction insulated trapdoor. The ladder is operated by a low-noise electric motor (with emergency power supply) with infrared remote control for the ultimate in convenience. It features an automatic limit stop and safety stop. The ladder is supplied complete with a telescopic handrail to the right hand side for safety and comfort.

- Ease of operation
- Low-noise electric motor with emergency back-up power supply
- Automatic limit and safety stop
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 4600mm (subject to model)
- High energy efficiency of 0.58 W/m²K
- Can be specified to meet F30, F60 or F90 fire resistance
- Can be made-to-order to meet your exact specification, with a wide-range of accessories
- Deep step depth of 140mm for safety and convenience

Escalmatic

The Escalmatic is supplied as a ready to fit unit, comprising of a stairway manufactured from painted stamped sheet metal, and attached to, a steel hatch box and insulated wooden trapdoor. The ladder is operated by an electric motor with infrared remote control for the ultimate in convenience. The ladder is supplied complete with two telescopic handrails for safety and comfort.

- Ease of operation and convenience
- Electric motor and manual back-up
- Infrared remote control
- load capacity of 150kg per step
- Optional 'Thermocover' provides good energy efficiency of 1.1 W/m²K
- Available in standard sizes for quicker delivery, or can be made to order to meet your exact specification

Fire resistant loft ladders

Supreme F30 Wooden Hatch Box

The Supreme F30 Wooden Hatch box is a fire resistant version of the Supreme retractable aluminium heavy duty loft ladder. It is supplied as a ready to fit unit, manufactured from high strength die-cast aluminium alloy components contained within, and attached to, a fire resistant hatch box and trapdoor manufactured from high-quality B1 chipboard. The heavy duty spring mechanism allows you to raise and lower the ladder with a minimum of effort. Large steps and pre-assembled telescopic handrail offer comfort, safety and ease of egress.

The Supreme F30 Wooden Hatch box loft ladder is certified by MPA Braunschweig for fire resistance of 30 minutes from below (F30)

- Ease of operation (operation force less than 3kg)
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 4600mm
- High energy efficiency of 0.80 W/m²K
- Fire resistant loft ladder and hatch box
- Can be made-to-order to meet your exact specification
- Available with a low-noise electric motor for the ultimate in convenience

Supreme F30 Steel Hatch Box

The Supreme F30 Steel Hatch box is a fire resistant version of the Supreme retractable aluminium heavy duty loft ladder. It is supplied as a ready to fit unit suitable for use in steel-reinforced concrete ceilings. The concertina ladder is manufactured from high strength die-cast aluminium alloy components contained within, and attached to, a fire resistant and highly insulated hatch box and trapdoor manufactured from sheet steel. The heavy duty spring mechanism allows you to raise and lower the ladder with a minimum of effort. Large steps and pre-assembled telescopic handrail offer comfort, safety and ease of egress.

The Supreme F30 Steel Hatch box loft ladder is certified according to DIN4102 Part 2 by MPA Stuttgart for fire resistance of 30 minutes from below (F30)

- Ease of operation (operation force less than 3kg)
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 4600mm
- High energy efficiency of 0.57 W/m²K
- Fire resistant loft ladder and hatch box
- Can be made-to-order to meet your exact specification
- Available with a low-noise electric motor for the ultimate in convenience

Supreme F60 / F90 Steel Hatch Box

The Supreme F60 / F90 Steel Hatch box is a fire resistant version of the Supreme retractable aluminium heavy duty loft ladder. It is supplied as a ready to fit unit suitable for use in steel-reinforced concrete ceilings. The concertina ladder is manufactured from high strength die-cast aluminium alloy components contained within, and attached to, a fire resistant and insulated hatch box and trapdoor manufactured from sheet steel. The heavy duty spring mechanism allows you to raise and lower the ladder with a minimum of effort. Large steps and pre-assembled telescopic handrail offer comfort, safety and ease of egress.

The Supreme F60 / F90 Steel Hatch box loft ladder is certified according to DIN4102 Part 2 by MPA Stuttgart for fire resistance of 60 / 90 minutes from below.

- Ease of operation (operation force less than 3kg)
- High strength, heavy duty loft ladder, with a load capacity of 200kg per step
- Maximum floor to ceiling height of 4600mm
- High energy efficiency of 0.93 W/m²K
- Fire resistant loft ladder and hatch box – certified to either 60 minutes (F60) or 90 minutes (F90)
- Can be made-to-order to meet your exact specification
- Available with a low-noise electric motor for the ultimate in convenience

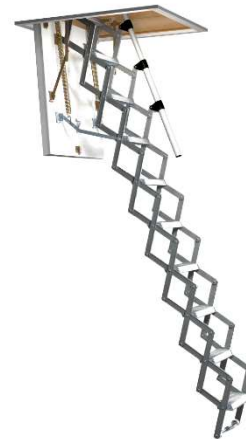

Mini F30 / F30 Plus / F60

The MiniLine F30 / F30 Plus / F60 aluminium loft ladder is a fire resistant version of the 'Mini' ladder, which is specially designed for small ceiling openings. It is supplied as a ready to fit unit, consisting of a space-saving aluminium ladder contained within, and attached to, a laminated wooden hatch box. The insulated trapdoor provides good energy efficiency and both sides are finished in white for improved aesthetics. It comes assembled with a telescopic handrail for comfort and safety.

The MiniLine is certified by MPA Braunschweig for either 30 minutes from below (F30) or 60 minutes from below (F60), for installation in either wood-beamed ceilings or concrete ceilings. For concrete ceilings only, the MiniLine is also certified to 30 minutes from below and above (F30 Plus).

- Designed for use in small ceiling openings
- Concertina aluminium loft ladder
- Load capacity of 150kg per step
- Maximum floor to ceiling height 3250mm
- Hatch box and insulated trapdoor for energy efficiency (rating of 0.92 W/m²K)
- Fire resistant loft ladder and hatch box – certified to either 60 minutes (F60) or 90 minutes (F90)
- Can be made-to-order to meet your exact specification

The ProfiLine F30 / F30 Plus / F60

The ProfiLine F30 / F30 Plus / F60 is a fire resistant version of the Cadet 3 wooden loft ladder. It offers an attractive design and is available in standard or made-to-measure sizes. It is supplied as a ready to fit unit, consisting of a 3-part folding wooden ladder contained within, and attached to, a wooden hatch box and an insulated trapdoor.

The ProfiLine is certified by MPA Braunschweig for either 30 minutes from below (F30) or 60 minutes from below (F60), for installation in either wood-beamed ceilings or concrete ceilings. For concrete ceilings only, the ProfiLine is also certified to 30 minutes from below and above (F30 Plus).

- Traditional style 3 part folding wooden loft ladder
- Can be specified to meet F30, F30 Plus or F60 fire resistance
- Hatch box and insulated trapdoor for energy efficiency (rating of 0.92 W/m²K)
- Load capacity of 150kg per step
- Maximum floor to ceiling height of 3200mm
- Can be made-to-order to meet your exact dimensional requirements
- Wide steps with anti-slip profile for comfort and safety
