OVERVIEW

Our range of External Ancillary products compliment the External Delta Systems. Allowing for application on different substrates and surfaces both for sealing and detailing with any provisions whilst preventing condensation.

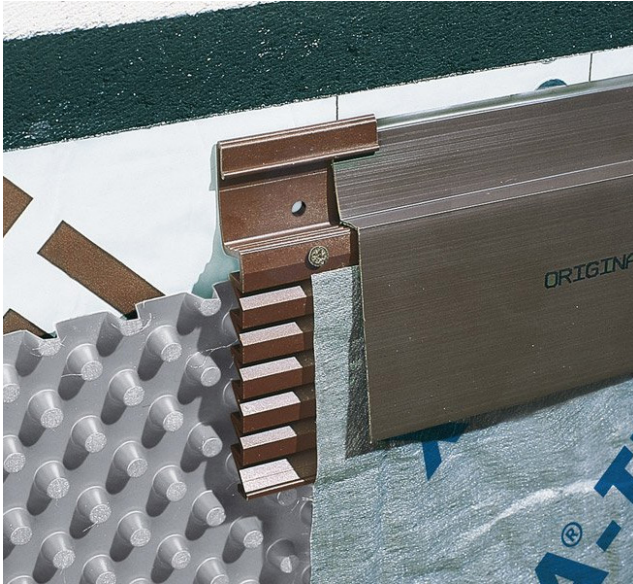

Delta's External Ancillary products come in the form of clips, profiles and fixings. We endeavour to offer you everything you need to complete a waterproofing installation. If you can't find what you need, feel free to contact us.

✓ BENEFITS

- Controls water ingress
- Tough, durable design
- Quick & easy application

GEO-DRAIN CLIPS & TERRAXX PROFILE

GEO-DRAIN CLIPS

Product Code: DMS093

The Delta Geo-Drain Clips are a mounting aid for quick and easy attachment of Delta Geo-Drain Quattro and Delta Terraxx. 126 mm long, 55 mm wide, available in a carton of 100 clips.

TERRAXX PROFILE

Product Code: DMS137

Very well suited for use in combination with DELTA drain membranes. Suitable for insulating materials from 60 to 110mm thick. Available in 2m strips.

PT PROFILE & TERRAXX-SCHRAUBE

MS PROFILE

Product Code: DMS017

Delta MS Profile Brown is ideal for use in conjunction with our external Geo-Drain Quattro, Terraxx, NP Drain and MS Drain. The MS Profile is a capping profile designed to prevent dirt and aggregate from getting down the wrong side of the geo textile membrane. MS Profile can be installed with ease with the Geo-Drain clips, as the profile simply slides on to the clips themselves.

TERRAXX-SCHRAUBE

Product Code: DMS038

Safe attachment of Delta Terraxx to perimeter insulation panels. Ideal for mounting the Terraxx protection and drainage system on perimeter insulation panels made of XPS with a thickness of 60 mm and above. Consumption 1 piece / m².

DELTA PLUGS & DELTA THAN

DELTA PLUGS

Product Code: DMS014

The Delta Plugs (11mm x 70mm) are used for fixing membranes to substrates. The Delta Plugs come in a box of 100. Delta Rope can be used around the head of the plug in order to create a seal

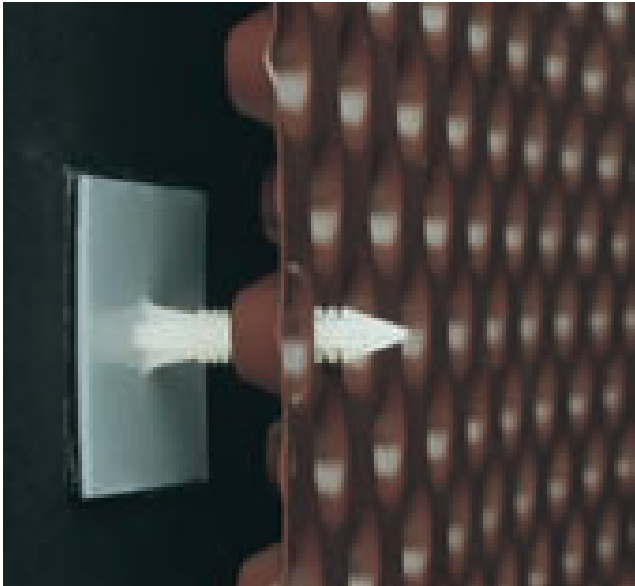

DELTA THAN

Product Code: DMS019

Delta Than is a superior waterproof mastic which is suitable for sealing joints and detailing. Available in 310ml tubes.

DELTA STOP PINS & CORNERSTRIP

DELTA STOP PINS

Product Code: DMS029

Delta Stop Pins are self-adhesive pins used to hold external membranes in place. Most suitable use to be applied on a primary waterproofer that is bitumen based such as Deuxan 2C. This allows for better adhesion of the Delta Stop Pins. Available in a box of 100.

CORNERSTRIP

Product Code: DMS020-1

Delta Cornerstrip is a waterproof, firm and lasting single-sided sealing tape, applied to seal wall to floor junctions. Delta Corner Strip creates a vapour seal, an ideal solution for patch repairs and detailing around service penetrations (150mm x 20m).

AQUADUCT 100

AQUADUCT 100

Product Code: DMS085

Aquaduct 100 is a perforated land drain used in conjunction with our external membrane systems. This allows for the collection of water to then be directed and sent to a sump station or soak away. Available in 100mm x 100mm. Other Accessories are sold separately - such as T Pieces, Straight Connectors and Y Pieces.
