DDA Compliant can be used in conjunction with wheelchairs and shopping trolleys.

Closed Construction and Open Construction Heel Safe

Description

A prestigious heavy duty matting, consisting of alternating silver aluminium ridged scraper sections with channelled replaceable 12mm thick strips of fine fluted black rubber. Street-Beater matting is designed for use in indoor and outdoor entrances such as airports, shopping centres, railway stations, shops, public buildings, schools, offices, hotels, leisure centres, banks and hospitals. The matting can be supplied in virtually any size or shape but for reasons of safe handling it is recommended that mat sections, which can be butted together, do not exceed 2m².

It is available in two thicknesses, standard 21mm and low profile 18mm.

The following constructions are available:

Closed construction – for normal interior entrance areas

Open construction – for external or excessively wet areas

Consult Jaymart Rubber & Plastics Ltd technical literature for details of the colours and finishes available. Jaymart Rubber & Plastics Ltd can also provide a design and specification service and it is recommended that they be consulted early in the design process.

The Jaymart system allows for perfect rib alignment without the need for T Bars.

Consult Jaymart Rubber & Plastics Ltd technical literature for details of the finishes available.

Jaymart Rubber & Plastics Ltd can also provide a design and specification service and it is recommended that they be consulted early in the design process.
