KEY PROPERTIES

- Pre-treatment for galvanised steel
- Promotes adhesion

PREPARATION

Ensure all oil and grease is removed from the surface to be painted by using Cleaner and Degreaser. Allow the surface to dry before application of subsequent coating. For more information and free Johnstone's Trade datasheets call 01924 354354 or visit www.johnstonestrade.com.

APPLICATION

Thoroughly work the Mordant Solution into the surface using a brush ensuring all the surface changes colour (blackens). If no initial reaction takes place, then a second application may be required. Rinse with clean water and allow to dry.

CLEANING

Remove as much product as possible from application equipment before cleaning. Replace cap firmly. Clean equipment immediately after use with warm soapy water and rinse thoroughly. Some local authorities have special facilities for the disposal of waste coatings. Do not empty product into drains or watercourses.
