Fire brigade, relief units,
Red Cross, relief organisations

Product range For any demand

Wardrobes

With our wide range as well as extensive options and interior accessories we can find a solution for any demand. Ranging from classic wardrobes to individual solutions.

Deposit box lockers

Deposit box lockers are space-saving and very robust. They offer the user a safe space for the small but valuable things in life.

powerBox

The deposit lockers with power supply are the perfect solution to charge batteries and store them safely. Each compartment offers secured power supplies.

Clever solutions for numerous sectors and refined product details are the result of continuous improvement projects.

Thomas Bopp,
Sales manager

Bench seating

The KEMMLIT bench seating range captivates with functionality and design-ranging from classic bench seats to stylish bench cubes.

Partitions and cubicles

Colour and design of our WC cubicle systems, shower and changing room cubicles are all coordinated to harmonise with the entire product range. With these we develop customised individual solutions.

Accessories

Hair dryer stations, shelves and coat hook rails complete the product range and can be considered already during the planning stage together with the sales representative.

IXOS P with HPL door – designed as Z-wardrobe

IXOS P stainless steel hinge and door opening restraint

IXOS P with HPL door 13 mm thick

IXOS[®] P HPL construction

The wardrobes IXOS P consist of solid grade HPL panels, which can be assembled fast and uncomplicated on site with special aluminium profiles in an innovative plug-in arrangement. Solid fittings, water resistance, ease of cleaning as well as high resistance to breakage help

distinguish IXOS P. Depending on the application a single or two-tier design or Z-shaped construction is available. The latter saves space but still offers room for long articles of clothing. Thanks to the individual design options IXOS P is versatilely applicable.

Water resistant

Wardrobe TYPO R with special colour and number plates

TYPO R stainless steel hinge and sturdy middle post

TYPO R coat rail with double hook

TYPO R Aluminium body

The locker body of TYPO R consists of eco-friendly and sea water proof aluminium. The form-fit metal body gains maximum stability and corrosion resistance due to the special press joint process. There are three different door options available: aluminium, HPL or

glass. The aluminium doors are coated with the scratch resistant overlay Crystal Coat. TYPO R also offers sector specific design options. Ranging from individual locking systems to innovative ventilation systems.

Sturdy

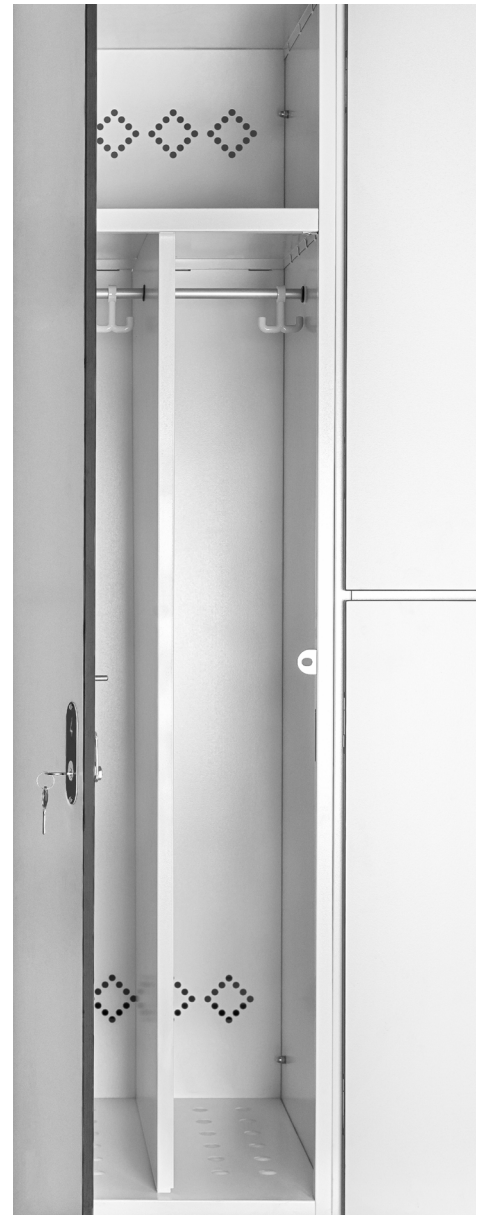

Versatile

Water resistant

Wardrobe TYPO S with glass doors in special colour and attached bench seating

TYPO S with HPL door and fixed partition

TYPO S Steel body

TYPO S is the proven solution made of fine sheet steel with scratch and abrasion resistant enamel coating. The form-fit metal body gains maximum stability and corrosion resistance due to the special press joint process. There are also three door options available for TYPO S:

steel, HPL or glass. Customised interior design options such as helmet hooks, fixed partition and locker ventilation are also available for TYPO S.

Sturdy

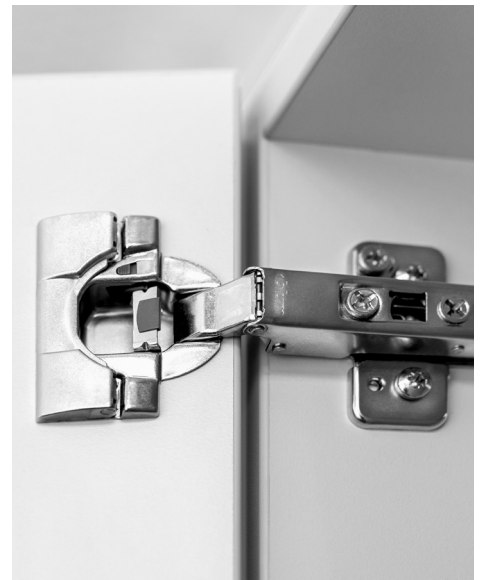

Versatile

Low-cost

Wardrobe PURO W as single and two tier locker

PURO stainless steel hinge with softclose-function

PURO coat rail with hook

PURO W/D Elegant furniture construction

Thanks to its solid construction without profiles PURO is the elegant wardrobe series. Depending on the area of application two different options are available: PURO W made of 13mm HPL for wet areas or PURO D made of 19mm sustainable wooden material. The standard

softclose-function allows for quiet closing of the locker door. PURO is available as single or two-tier locker. The compartment shelves are height adjustable. The wardrobes are ideally suitable to stow private items and for the application in offices and administration.

Quiet

powerBox with PIN lock

powerBox service compartment for maintenance

powerBox safety power bar

powerBox Lockers with power supply

The powerBox deposit box lockers are the perfect solution for recharging batteries and keeping them safe at the same time. Each compartment is supplied with two electrical outlets and two USB connections, so e-Bike batteries, smartphones, tablets and lap-

tops can be recharged. The KEMMLIT safety package consists of an overload protection and an earth leakage circuit breaker. The standard break-in constraint prevents theft and vandalism. The locker carcass is made of aluminium. The doors are made of solid grade HPL.

HPL door with engraved numbering

HPL door with number plate

Single shell steel door with ventilation slits

Steel doors with perforation holes

Double shell steel door with coin return lock

Swivel latch lock for padlock provided on site

Material

Our product portfolio is defined by numerous materials which are perfectly coordinated. For any demand or any budget we will find the suitable material.

– HPL (High Pressure Laminate)

HPL is a high pressure laminate panel made of paper layers which are press-joint together under high pressure. HPL is high-grade, hygienic, wet area suitable and heat resistant.

– Glass

For the locker doors toughened safety glass is used. Glass is defined by its high class appearance, stability and easiness to clean.

– Aluminium

This material is ideally suitable for wet areas. The sea-water resistant aluminium has a Crystal Coat coating.

– Steel

Locker doors made of steel are scratch and abrasion resistant. Due to the zinc coating with aluminium parts the wardrobe lockers made of steel have increased corrosion resistance.

– Wooden material

Wardrobes made of wooden material are made of sustainable material

Locks and fittings

No matter whether alternating or personal use, KEMMLIT offers the ideal and individual solution.

– Mechanical locks

- Swivel latch lock for padlock provided on site
- Cam lock
- Case latch lock
- Coin return lock
- Number combination lock
- Further options available on request

– Electronic locks

- PIN locks: without elaborate key management PIN locks can be opened or closed with either alternating or dedicated PINS.
- RFID locks: with RFID technology the wardrobes can be locked with either a ticket or chip. Even established chips such as time cards can be integrated.

– Door fittings

- Numbering with engraving/number plates
- Letter drop slit
- Ventilation slits
- Viewing window made of plexiglass (only HPL)
- Further options available on request

- Special accessories for fire brigades and rescue teams

- Helmet holder
- Sturdy hook for fire fighter belt
- Internal deposit box with insertion slit

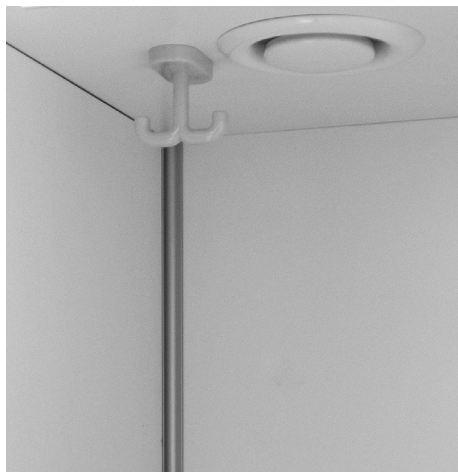

Climate Ideal ventilation concepts

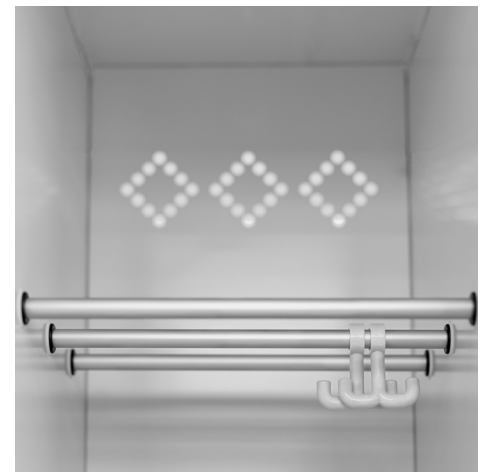

Forced ventilation with connection to on site ventilation system

Electronic ventilator for active air exchange

Disc valve

Ventilation perforation within the back panel

A smart ventilation concept offers many advantages: it prevents unpleasant odours and allows for clothes to dry fast.

– Self ventilation

All models are designed to provide permanent air circulation. This is accomplished with a recessed top and base or with ventilation perforation within the back panel or door. With an additional perforated base the air exchange can be increased.

– Electronic ventilation

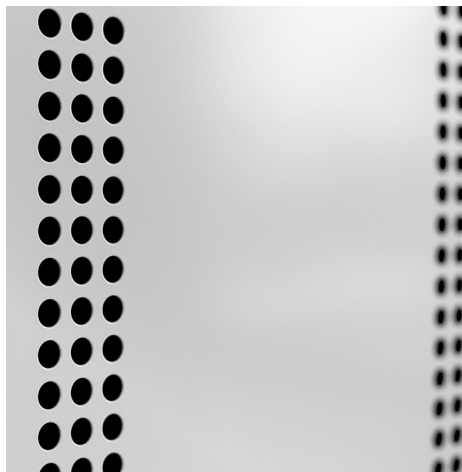

In order to increase the air exchange within the locker and to speed up the drying process of clothes, the wardrobe can be outfitted with an electronic ventilator, continually blowing the humid air out of the locker.

– Forced ventilation

For ideal air circulation and a perfect indoor climate it is recommendable to connect the locker to an on site ventilation system. The connection is accomplished with an adjustable disc valve within the locker top. As an alternative the ventilation channel can run through the sloping locker top. We recommend HPL infill panels above the locker all the way up to the ceiling as an elegant way to hide the ventilation channels.

Self ventilation within the locker base

Perforated door for ventilation

Surface design Real eye-catchers

Wardrobes IXOS P with individual digital print

Wardrobes IXOS P with individual digital print

powerBox deposit locker with foil print

With the implementation of individual digital and foil prints, various wooden decors or special colours, your wardrobes and deposit box lockers will turn into real eye-catchers!

- Digital print

These are ideally feasible with HPL doors. Unique changing room areas evolve with special designs. There are no limits to the imagination regarding the themes. Whether it be abstract symbols, lettering, company logos or fantastic photo prints. Individual digital prints perfectly complete well thought through room concepts bestowing that certain something to the area.

- Foils print

Foil print can be realised on any surface – large-scale or as isolated design. We will gladly consider your individual design already during the planning stage.

- Wooden décor and special colours

On request we also offer various wooden decors and special colours.

Wardrobe IXOS P in wooden décor

Quality Made in Germany

Your individual product is produced with state-of-the-art machinery, under permanent quality control within the production as well as all other departments.
