

Stannah Midilift PL

Simple, convenient, and versatile:
platform lifts for accessibility in
a limited space

Stannah

“Our Stannah platform lift has made facilities on the 1st floor accessible to everyone. We specified Stannah because of their brand and reputation, which they have certainly lived up to.”

Client Owner, Gosforth Physio

Simple, convenient accessibility

At Stannah, we believe that accessibility solutions should be exactly that – accessible. That’s why our PL platform lift range prioritises what matters most: safety, comfort, and versatility – with options for indoor and outdoor use.

Since 1995, Stannah has proudly installed more than 11,000 platform lifts throughout Great Britain, helping thousands of people get to where they need to be each day.

For private residents, your platform lift should deliver safe and energy-efficient accessibility – but it should also reflect your style and vision. For commercial customers, we know how important it is to deliver compliant and fuss-free public access.

And now, we’re launching a new era of comfort and convenience – unlocking access in public buildings and future-proofing private homes – even where space is limited.

Convenient, tailored mobility – anywhere

From private residences and hotels to schools, offices, and shops – our platform lifts are designed to fit seamlessly. The PL is also our quietest solution yet at just 48dB, the same volume as a modern refrigerator.

And because the range is so versatile, we can overcome architectural limits with minimal disruption. Its screw-driven system and structure means there's no need for an external cabinet or machine room to power and control your lift – everything is onboard.

And to ensure your lift looks the part, we offer a comprehensive range of finishes – both colours and textures – to stand out or blend into your environment. The choice is yours.

Robust safety and quality you expect from market leaders

We take safety seriously and ensure all our lifts adhere to strict industry regulations. Whilst also helping to comply with the Equality Act, Part M Building Regulations (England and Wales), and Section 4.2 of the Building Regulations Technical Handbook (Scotland).

Our platform lifts comply with the following:

- **EN81-41:2010** - Vertical lifting platforms intended for use by persons with impaired mobility
- **UKCA marking** - All our lifts are UKCA marked and comply with the Supply of Machinery (Safety) Regulations 2008 (2008 No. 1597)
- **2006/42/EC Machinery Directive** - The protection of free market machinery circulation as required by the European Union

We work to ISO 9001, ISO 14001, ISO 45001 certifications. We're also an active member of the Lift and Escalator Industry Association (LEIA) – an advisory body helping drive best practice across the industry.

A comfortable ride for everyone

Our PL range of platform lifts are built to solve the needs of vertical mobility in all environments. The screw and nut drive is equipped with an inverter for a smooth start and stop.

Whilst its compact, ultra-light, and attractive aluminium structure balances minimalism and practicality for effortless accessibility.

PL lift styles

Outdoor

Indoor

Half-gate option (indoor or outdoor)

A trusted name in mobility across Great Britain

Whether you're enhancing your home, or you need a safe and cost-effective way to satisfy the Equality Act, we can help. This includes lifts for new builds, and retrofitting existing buildings to improve accessibility to upper floors.

The PL range delivers a classic platform lift experience – indoor, outdoor and half-height gate options for restricted headroom, these lifts deliver simplicity and affordability.

What's more, every PL lift comes with a 24-month warranty, including four service visits per year as standard for added peace of mind.

Key facts

Lift description	Vertical platform lift within its own structure
Max. no of stops	5 stops
Max. travel (m)	12m, up to 3m for half-height gate option
Speed (m/s)	0.15 m/s

We have a wealth of materials and resources to aid with the selection and specifications of your lift, including finishes and options, technical datasheets, CAD resources and NBS specifications. Please call us on 01264 339090 or visit stannahlifts.co.uk for more information and technical advice.

Expert support on your doorstep

Since 1867, we've been transforming accessibility for millions across the UK – and now it's your turn.

With more than 150 years of lift experience, and millions of customers served, we understand the value of personalised service. Every customer, and every building, is unique – a truth we consider in every lift we build.

Whether you're a homeowner or a professional, you'll enjoy a tailored service, including technical advice, a dedicated project engineer and maintenance support post installation.

With Stannah, you get:

- ✓ A company you can rely on
- ✓ Costs that make sense
- ✓ Superior service and ongoing care
- ✓ Quality guaranteed

Six steps to your ideal lift

You make contact

You can contact us via email or phone to get started on your Stannah journey, sending any photos, project details, building drawings or required specification you may have.

We'll provide a free no-obligation quote

Based on your information we can either supply a free no-obligation quote or if needed we'll get in touch to visit your home or commercial location to discuss your options.

Confirm your interest

Once you've decided to proceed, and you're happy with the quote, just give us a quick call and we'll begin finalising contracts and getting to work on your builder's work drawings and requirements to enable you to get the site ready for lift installation.

Getting site ready

Working to our product delivery timescales and any project deadlines, as the project progresses your dedicated project engineer will visit. They'll run through the lift specification with you and complete any dimensional checks we need before installation.

Installation begins

Two of our NVQ-qualified installers will fit your lift quickly and safely, working to the highest standards. Once ready for the final stages of lift install we'll provide a detailed handover to ensure you are confident using your lift.

Ongoing support from a leading service company

Every one of our latest Midilift PL products comes with the added reassurance of ongoing servicing through one of our 11 service branches. Our branch network takes care of all makes and models of lifts and our exemplary service levels, breadth of coverage, and 100,000-strong service portfolio set us apart from the competition.
