rethinking stairways

ABOUT VULCAN

Vulcan Architectural is known for its high profile in creating Stair solutions. We add value to clients properties through the careful design and planning with practical advice. Our team is structured to assist in giving a wide range of respected blue chip client's control in their new build or re-development program. We provide the expertise to understand their goals and objectives to create clever, practical and functional walking areas.

CASE STUDY

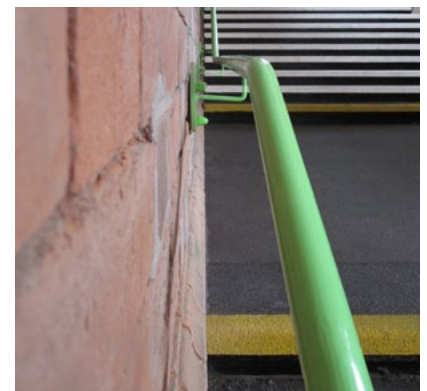

Address London Midland - Sutton Coldfield Station

Size 1 refurbishment project

Total project value Not disclosed

Case For this project, the client, working on behalf of the whole design team, wished to fully upgrade the DDA vision and AFA access to this property. Using Vulcan Tread Systems, we worked closely with the team, carrying out the manufacture, colour contrast advice, station surveys, enabling us to advise on substrate preparation, repair, structural conditioning and installation procedures, ensuring all end results met the high standards expected. Vulcan worked carefully with the Contractors, ensuring everything was on site, on time and on budget.
