

Glenmorangie, one of the world's most popular producers of single malt whisky has recently chosen to use Eurobond's flagship architectural product Europanel for the development of its new bottling plant in Livingston West Lothian. The Company's new £13m facility was officially opened by The Duke of York on 7th September 2011 and is part of a wider £45m investment programme launched by the company in 2008.

CLIENT		The Glenmorangie Company
PRODUCT		Europanel
COATING		Colorcoat Prisma® by Tata Steel
CONTRACTOR		Hathaway Roofing Ltd

In total Eurobond has supplied over 4,500 m² of metal faced stonewool composite panels in a striking Slate coloured prefinished steel in Colorcoat Prisma® by Tata Steel, providing outstanding aesthetics and a Confidex® guaranteed, maintenance free long lasting performance.

The Glenmorangie development is situated on an 11 acre site as part of the Alba Business Park, and has taken advantage of the key benefits of Europanel & Rockspan panels to satisfy the requirements of both the office and bottling units.

The front of the building utilizes the architectural qualities of Europanel and thanks to the secret fix joint, architectural flatness and 1mm modular flexibility between 300 and 1200mm wide creates a visually pleasing façade, The Europanel™ system has been developed as a 'total wall' solution and is designed to be integrated with a variety of building components.

Rockspan was used for the two bottling plants, and is ideally suited for cladding large expanses of wall quickly and efficiently by taking advantage of its long span performance and 'built-in' fire protection essential for both life safety and property protection requirements.

The new facility is designed to minimize energy and water consumption and both Europanel and Rockspan provide excellent thermal insulation performance and air tightness, when correctly installed. In addition to helping reduce operational carbon, Eurobond panels also contain a high recycled material content and both steel and stonewool can be recycled in a closed loop recycling process.

Colorcoat, Colorcoat Prisma and Confidex are registered trademarks of Tata Steel UK Limited.
